-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

1. An Amendment was filed 11/18/05.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 1-7, 9, 18, 19 and 35** are rejected under 35 U.S.C. 102(b) as being anticipated by Grawey et al, Re 37174.

Grawey discloses an apparatus for converting a wheeled vehicle into a tracked vehicle comprising

Support frame including support structures 42 and 152,  
First 24, and second 26, hub assemblies to be fastened to first 58, and second 60, axles/wheel flanges, respectively, in which the (original) wheels have been removed,

The first hub assembly including track-receiving surfaces/projections 50, 68,

Both assemblies are adjustable along the length of the support frame, as provided in c11, ln 39-45, including "longitudinally separating the mounting axles 58, 60", and so to also accommodate different wheelbase lengths, and,

have limited movement with respect to the frame (i.e., movement constrained by the mounting arrangement), so as to compensate misaligned or irregular axles, as *broadly and reasonably interpreted*, and,

Endless track 5 encircling both assemblies,

Wherein two wheels on one side of a wheeled vehicle are replaced by the apparatus.

3. ALLOWABLE SUBJECT MATTER

a. **Claims 8, 10-17, 20-34** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Prior art does not disclose the invention described above further comprising, *inter alia*, a connection between the hub assemblies and an attachment member that is rotatable about a vertical axis.

b. **Claims 36-42 are allowable** because prior art does not disclose the invention described above further comprising, *inter alia*, the track being engaged by either of the first and second hub assemblies.

4. RESPONSE TO REMARKS

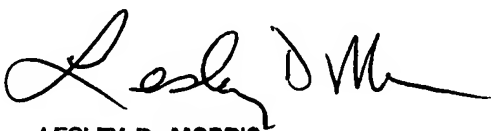

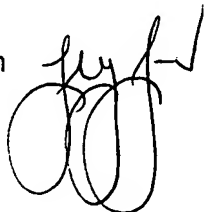

Examiner has provided new rejections employing Grawey, and apologizes for the inconvenience.

5. Communication with USPTO/Examiner
